

Add a user to your system:

```
adduser <username>
```

Add a user to your system with a specific home directory

```
adduser --home <directory> <username>
```

Add a user to your system with a specific group:

```
adduser -g <groupname> <username>
```

Change a user's password

```
passwd <username>
```

Change a user's home directory

```
usermod -h <directory> <username>
```

Add a group to your system

```
addgroup <groupname>
```

Deleting a user

```
userdel <username>
```

Delete a user as well as their home directory

```
userdel -r <username>
```

Delete a group

```
groupdel <groupname>
```

Change a user's primary group

```
usermod -g <groupname> <username>
```

Add an existing user to an existing group as a secondary group:

```
usermod -a -G <groupname> <username>
```

To view a user's list of groups, GIDs and UID:

```
id <username>
```

To view a user's groups:

```
id -G -n <username>
```

A list of all users on the system can be found in the file:

```
/etc/passwd
```

A list of all groups on the system can be found in the file:

```
/etc/group
```
